

Evaluation Resources for Cancer Control

In cancer control, evaluation assesses a program's, evidence-based intervention or initiative's effectiveness and functioning, demonstrates transparency and accountability, informed decision making if the project is yielding the desired outcome,

The resources listed below help understand how to perform an evaluation and provide tools to guide the process.

- 1) [What is Evaluation? American Evaluation Association](#)
- 2) [Cancer Prevention and Control | The Community Guide](#)
- 3) [The Community Preventive Services Task Force Cancer Screening Recommendations](#) (PDF)
- 4) **The Community Tool Box:** Operated by University of Kansas, has great resources for evaluating complex community led projects (Including an [overview](#) and some more specific details about [participatory evaluation](#) and [other considerations](#)).
- 5) **Center for Education, Engagement and Evaluation:**
 - [Evaluation 101 - Resources](#)
 - [Evaluation 101 | CEEE](#)
- 6) **Framework for Evaluation in Public Health Resources:**
 - This [checklist](#) and explanation of each standard from the Evaluation Checklist Project is a great summary.
The revised 2024 Framework, with additional standards and cross-cutting actions: [CDC Program Evaluation Framework, 2024](#). A longer, more thorough [Action Guide](#) for the program evaluation framework was also published in 2024.
- 7) [A Guide to Real-World Evaluations of Primary Care Interventions: Some Practical Advice | Agency for Healthcare Research and Quality](#)-effective primary care can improve health and cost outcomes, and patient, clinician and staff experience, and evaluations can help determine *how best* to improve primary care.

- 8) **Video Resource:** How do I know if an intervention is evidence-based? [Evaluating Evidence Based Practices: Implementation | NCI](#)
- 9) **The National Colorectal Cancer Roundtable (NCCRT) Evaluation Toolkit:**
- [NCCRT Evaluation Toolkit](#) is intended to help organizations and communities evaluate a wide variety of interventions designed to increase awareness and cancer screening.
- 10) **RE-AIM and PRISM Model:** *Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM)* and *The Practical Implementation Sustainability Model (PRISM)* are an integrated framework developed to improve the adoption and sustainable implementation of evidence-based interventions in a wide range of health, public health, educational, community, and other settings.
- [RE-AIM – Home – Reach Effectiveness Adoption Implementation Maintenance](#)
 - [What is PRISM? – RE-AIM](#)
- 11) [Project ECHO® Evaluation 101: A Practical Guide For Evaluating Your Program - New York Health Foundation](#)
- 12) **National Institute of General Medical Services Evaluation Resources:**
