

10/18/2023

PCC Men's Health Workgroup meeting called by: Patrick Loftus

10:00am – 11:00am

New members, introduction

Updates:

- Know Your Roots flyer for young men: English and Spanish versions finished and approved, along with a guide for use. Input on the guide was received, with a need for further explanation for partners.
Updated language in the guide will be sent for translation by the end of this week. The guide will be sent as an email along with the flyers, in both English and Spanish.
- HB 531: we haven't had any updates on status of the HB. We did reach out for more information, and this will be shared with the group once we have any news.
- Work Plan: Group discussed our goals, and identified three/four strategies to target. The preliminary work group plan with the strategies will be shared with all members by end of this week, so we can start working on projects to meet our goals.
Several ideas were presented, including:
 - collaborating with the Policy WG on one of our goals
 - having a medical professional/subject expert speak during a webinar that will be recorded for ongoing use (more information on this once we have a commitment)

Next meeting: November 15th, 10 am
